Harlon J. Wilson

**President & CEO
Medical Animatics, Inc.
Legal Animatics, Inc.**

**B.S. & M.S. Media Arts & Sciences
Indiana University School of Informatics**

**Certificate in Applied Computer Science
Purdue University - Indianapolis**

Harlon Wilson is a founding partner of Medical Animatics, Inc. where he currently serves as President & CEO. A 2005 Graduate of Indiana University Purdue University School of Informatics, Harlon holds a Masters in New Media Arts & Science, with a Computer Science Certificate and a minor in Sociology. In addition to graduating with distinction, Harlon's honors include Golden Key Honor Society, National Deans List, and he is a recipient of the Indiana University Alumni Association Top 10 Outstanding Student Award, CPI Mentor of the Year Award, and Christine Jakacky Mentor of the Year Award.

Before returning to academics, Harlon enjoyed 14 years of leadership in the medical software industry where he specialized in electronic data interchange (EDI) and practice management integration technology for medical billing. Harlon has developed a mastery of teaching technically complex information. He has previously served as a technical support and trainer for IU & Riley Hospitals Nursing Information Services, he built and managed an EDI Division for a statewide practice management software vendor, and as the Director of Integration technology for a health care claims clearinghouse, Harlon assembled and managed a national team of practice management integration specialists who successfully integrated "real-time" claims processing into IDX, Medic, MedicalManager, and other leading practice management and electronic medical records applications. Harlon has conducted numerous presentations on technology topics such as Y2K Preparedness, Health Information Portability and Accountability Act (HIPAA), and Medicare, Medicaid electronic claims processing.

In keeping with his passion for healthcare, Harlon is at the helm of Medical Animatics, Inc. A firm that is taking its place as a nationally recognized leader in the production of animation, video, and web based training technologies for the health education, medical, and science industries. Harlon's in-depth knowledge of healthcare, extensive knowledge of cutting-edge multi-media technologies, and his longstanding success of working with hospital administrators, physicians and medical staff across the nation have earned Medical Animatics, Inc. high-profile client and partnership opportunities which include video analysis and bio-mechanical training tools for coaches and elite athletes of the US Olympic Dive Team and Princeton University Varsity Diving, Indianapolis Colts, and internationally deployed web based training modules for a division of Hewlett Packard, and a partnership with Indiana Microsurgical to develop a nationally

distributed patient informed consent multimedia application that teaches patient's LASIK surgery treatment options and associated risk factors.

In his spare time, Harlon enjoys networking and exploring opportunities to develop partnerships in support of health, safety, and cultural diversity. He has served as a member of the Minority Health Coalition, Indianapolis Immunization Coalition, and the IU School of Informatics Legislative Strategy Committee. His current memberships include The Mayor's Cultural Tourism Council, the USA Diving Performance Enhancement Team, and The National Fire Prevention Association's – Risk-Watch State Management Team.

Harlon enjoys research and writing on topics relating to sociology, philosophy, and spirituality. His personal works include exploration of technology's impact on society and concepts relating to knowledge acquisition. Harlon's personal favorite is exploring world religions, culture, and philosophy with a focus on topics relating to "synchronicity" of "flow" experiences. Harlon's recommended books on the topic include: Synchronicity: The Inner Path of Leadership by Joseph Jaworski, and Flow: The Psychology of Optimal Experience by Mihaly Csikszentmihalyi.
