Linda L. Lentz

Chief Operating Officer
Medical Animatics, Inc.

B.A. Education
Purdue University

M.A. Economic Education and Entrepreneurship
University of Delaware

Linda Lentz joins the Medical Animatics, Inc. team as Chief Operating Officer. A 1988 graduate from Purdue University, Linda holds a B.A. degree in Education and a M. A. degree in Economic Education and Entrepreneurship from the University of Delaware.

Ms. Lentz brings 14 years of leadership in the distance learning industry with specialized expertise in healthcare, K-12 education and informal learning environments. As the former Chief Learning Officer and co-founder of an Indiana based communications technology firm, Ms. Lentz has created products and services that assist clients with the integration, deployment and utilization of videoconferencing, video streaming, video surveillance and web conferencing solutions. Flagship projects include designing and developing a web based content portal of programming resources, collaboration tools, scheduling and activity tracking capabilities used by K-12 schools nationally, content development for renowned academic, cultural and informal learning institutions across the country, development of a variety of end user training, planning, assessment and evaluation instruments for communications technology, and oversight and management of the adoption and implementation of a state-of-the-art Telehealth initiative with a major hospital and six of their affiliate critical access hospitals for use in innovative EMS and CME applications.

Ms. Lentz has extensive experience planning, writing and reviewing private, state and federal grants which has resulted in recent awards of over \$5 million. She has served on the National Endowment of the Arts grant review panel in 2001 and 2002, is the Past President and founding Board member of the Indiana Distance Learning Association, currently serves on the Executive Committee for the Indiana Council for Economic Education and other cultural and community organizations, and has delivered presentations at numerous regional, state and national conferencing across the country including the American Medical Association and National Educators Computing Conference. Ms. Lentz also co-authored a white paper for a leading industry

manufacturer on the current state of videoconferencing utilization in the K-12 marketplace.

In her spare time, Ms. Lentz enjoys research and reflecting on global issues surrounding economic interdependence, the environment, arts, indigenous people and conflict resolution. She continues to support a content providing organization's efforts to connect youth with experts and their peers around the world to have meaningful dialog about real world issues and concerns. Ms. Lentz also plans to assist in a state-wide entrepreneurship program for K-12 students and educators.
